While the aligners move the

**TEETH**  
into alignment

The (S•M•A•R•T)<sup>®</sup> aligner acts on

**THE TONGUE**  
so it rests  
against the  
palate

**THE NOSE**  
to breathe  
properly

**THE LIPS**  
to seal them

By associating both dental  
alignment with (S•M•A•R•T)<sup>®</sup>  
aligners, it is possible to:

- **improve** the functions (breathing, swallowing, chewing)
- **improve** stability of teeth in the long term
- **reduce** treatment time
- **improve** facial aesthetics
